FOR SALE – Listing #KK161X

The inside story . . .

Assembly at Brown Lenox works, Polkville.

Flange iron protection is provided by a spring loaded safety device.

Toggles, pinman and eccentric operate in a sealed chamber . . .

Flow meter protects mechanism against oil pump failure.

Hydraulic adjustment available with models 75S and above.

www.rockindustry.com

- ① Hinge pin on crushing chamber centre-line for crushing without rubbing. Large bearings and integral lubrication.
- ② Wide entry throat ensures easy feeding to crushing chamber.
- ③ Cast steel swing jaw is balanced to avoid power losses through lifting on crushing stroke.
- ④ A light small diameter flywheel is all that is necessary with the low inertia of the mechanism.
- ⑤ Operating mechanism is totally enclosed for maximum life and minimum maintenance.
- ⑥ Double toggles provide maximum leverage to long-stroke eccentric. Pull-back and lifter springs automatically compensate for wear.
- ⑦ Light-weight pinman is always in compression and bears directly on the underside of the eccentric.
- ⑧ All adjustments are carried out on the fixed jaw to avoid disturbing the crushing geometry.

Our Crushers have a double toggle action to give the maximum mechanical advantage to the eccentric. Crushing on the downward stroke enables a much lighter pinman and toggle to be employed, so reducing wear and increasing efficiency and greater throughput can be achieved.
