KOBE KD74x54
DOUBLE TOGGLE JAW CRUSHER

- **KOBE KD7454** - 74" x 54" Double Toggle Jaw Crusher – S/N: TBA
- Massive **565 to 880 tonnes per hour (TPH)** production rate (as per Kobe specifications enclosed).
- Dry toggle configuration with full adjustment.
- Bearings, Main eccentric shaft, swing jaw, toggles seats and plates, main frame and pitman in excellent condition.
- Jaws Plates and Wear Plates in Good Condition.
- Made in Japan. Excellent Quality.
- This Unit is in excellent condition and has had limited usage.
- Well below new unit price. Price is delivered to Major Asian Port.

DOUBLE TOGGLE JAW CRUSHER

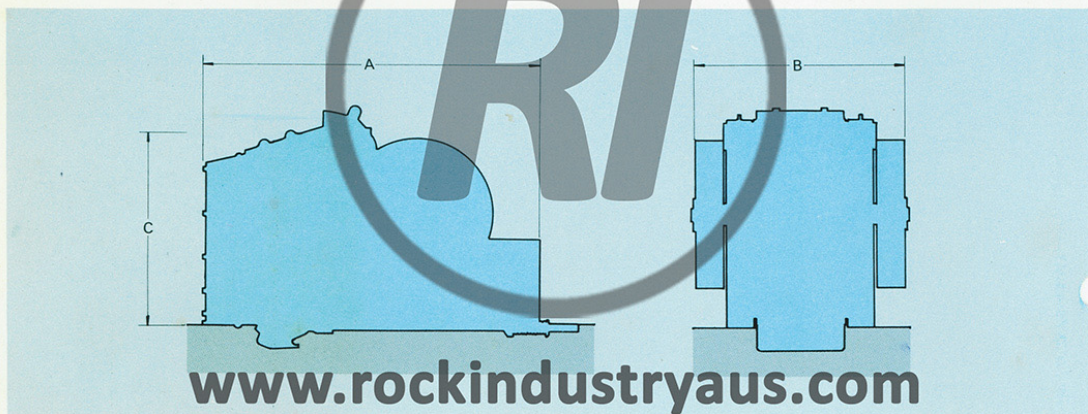

GENERAL

The double toggle jaw crusher is suitable as the primary or secondary crusher in the crushing plant. Ranging in crushing capacity from small lumps of rock to large lumps up to more than 2,000 mm in size, all Kawasaki double toggle jaw crushers are manufactured based on a background of distinguished technique and rich experience. This crusher is ideally suited when enlarging a crushing plant, and for economical crushing operation.

MAIN DIMENSIONS

Model	Dimensions (mm)		
	A	B	C
KD3021	2,760	1,900	1,580
KD3628	3,820	2,340	2,110
KD4232	4,710	2,810	2,515
KD4842	4,810	3,010	2,830
KD6048	5,600	3,500	3,225
KD7454	6,290	3,980	3,655
KD8460	7,050	4,950	4,125

MODEL & CAPACITY

	Model	Feed opening (mm)	Capacity (t/h)														Revo- lution (rpm)	Motor	
			Discharge set (Open side setting, mm)															(kw)	(P)
			20	30	40	50	60	70	80	100	125	150	175	200	250	300			
Coarse Type	KD-3021	750x 525				45	60	75	85	110	135	160					260	45	6
	KD-3628	900x 700					85	100	120	165	200	225	245	265			220	75	8
	KD-4232	1,050x 800							160	210	250	285	315	340			210	95	10
	KD-4842	1,200x1,050								260	325	370	405	435	500		200	130	10
	KD-6048	1,500x1,200									425	505	565	605	675	715	180	190	10
	KD-7454	1,850x1,350										565	640	705	825	880	150	220	10
	KD-8460	2,100x1,500											605	715	805	880	960	125	10

Notes: 1. Crushing Capacity varies with property and size of raw material.
2. This table shows approximate crushing capacities for limestone.

FEATURES

MAIN FRAME

The main frame is made of a thick steel plate, and swing jaw and pitman are made of carbon steel casting, providing rigid and strong construction which uses a computer calculated design.

CRUSHING CHAMBER

Especially deed crushing chamber and small nip angle provide high crushing capacity, and minimize materials' slip and jaw plates' wears.

MAIN BEARINGS

Four spherical roller bearings are used, which can withstand heavy loads and have a long service life. The bearings are grease lubricated and oil sealings are used to give a thorough seal against dust.

MAIN SHAFT

The main shaft is made of a forged alloy steel (SCM 4), which is capable of withstanding severe impact loads.

SET ADJUSTMENT

Easy set adjustment is possible by means of a hand-operated hydraulic ram which is supplied as a standard accessory.

JAW PLATES & CHEEK PLATE

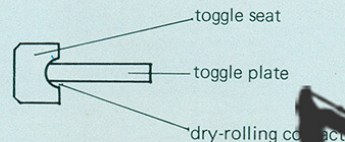

The jaw plates and cheek plate are made of high manganese case steel which has a long wear life.

Since they are mounted without the use of bolts, they are easily removed for maintenance and there is no localized wear due to either bolt holes or bolt head.

TOGGLE PLATES & TOGGLE SEATS

No lubrication is needed since due to dry-rolling contact between the toggle plate and toggle seat.

This system provides easy maintenance and operation. The toggle seat is made of forged alloy steel and hard-facing.
